ABOUT ME

29 years field & managerial experience in the upstream industry working with a service company for a multitude of International & National Operators.

My technical expertise range from Well Testing to Completions with a Project Management Qualification (PMP).

I have strong team leading experiences in business, sales, operations & various high profile projects. I currently hold a position in Schlumberger Completions HQ as Development and Integration Manager for operational organization, processes and business systems. I also instruct Completions Project management courses for the company and am a corporate contact point for Risk management.
